

**Tony Cook** is a country music artist with a passion for the outback, good people & great music.

Tones music reflects his passions & background and he has been quietly building a collection of original material over the last few years while making a name for himself along the way.

Having released three singles off the forthcoming debut album Laidback Country, Tony's music has done remarkably well, considering all three have charted around the country, two of which hitting the #1 spot on various national and state airplay charts. He then backed up this success with a host of major event appearances.

With performances at the The Julia Creek Dirt & Dust Festival (2017 & 2018), Winton's Way Out West Fest (WWOWF 2018) and Rockhampton's, Beef Week Australia (2018), River Festival (2017 & 2018) and Australia Day ceremonies (2018) he's been kept fairly busy.

Tone's passion for the outback is evident in his story telling and songwriting, he is always engaging and entertaining, with his live shows consisting of a variety of good solid original & classic country music as well as some highly popular mainstream covers from artists and bands such as Paul Kelly, Creedence Clearwater Revival, Johnny Cash, Garth Brooks & The Zac Brown Band which always gets crowds buzzing.

If you get the opportunity to find out what the underground movement in Outback Queensland's been talking about, be sure not to miss Tony Cook & his band The B.A.R.B. (The Busted Arse Ringers Band, previously known as "The Bush Kings").
